

How a luxury real estate group is saving almost \$10K per month on building management, keeping 70 companies safer.

**10 days** to return on investment

**90%** reduction in monthly cleaning costs

**90%** reduction in environmental waste

*“The safety of our staff, residents and visitors is the utmost priority to PLG. We are very happy with our test results and the resource savings created.”*

*- Doreen Yeo, VP Property Management*

### The Business:

Luxury real estate group Pontiac Land Group, own and manage the iconic Millenia Tower in Singapore that home to over 70 businesses. These businesses are reached every day by 19 KONE MiniSpace™ elevators. KONE were keen to find a new innovation partners to address the challenge of increased hygiene costs for clients like Pontiac Land Group, so they partnered with Kastus® in March 2021.

### The Challenge:

As the pandemic had increased cleaning schedules the building management team were spending more than 200 extra hours per week cleaning the elevator touchscreens to reduce fomite transmissions! It was a vital task but one that was costing them almost \$11,000 per month in labour resource and traditional cleaning products, while also creating 33 hours of potential downtime split between the 19 elevators on a daily basis.

### The Solution:

Kastus® screen protectors were quickly and easily retro-fitted to all elevators panels in Millenia Tower. Our unique technology meant there is now continuous protection against viruses and bacteria for employees and visitors alike. Pontiac Land Group confidently reduced their cleaning cycles by 90% – saving almost \$10,000 a month.
